Each software is released under the type of license that can be found on the pages of the program, as well as on the search pages or category. These are the most common types of license: Freeware programs can be downloaded for free and without time constraints. Freeware products can be used free of charge for both personal and professional use (commercial use). Open Source/Open Source software is software with source code that anyone can inspect, modify or upgrade. Programs released under this license can be used at no cost for both personal and commercial purposes. There are many different open source licenses, but all must comply with the open source definition – in short: the software can be used, modified and shared freely. Free to Play/This License is commonly used for video games and allows users to download and play the game for free. Basically, a product is offered Free to Play (Freemium) and the user can decide if they want to pay the money (Premium) for additional features, services, virtual goods or physical that expand the functionality of the game. In some cases, your ads may show to users. Demo/Demo programs have limited functionality for free, but charge for an advanced set of features or for removing ads from the program interfaces. In some cases, all functionality is disabled until the license is purchased. Demonstrations are not usually time-limited (such as test software), but functionality is limited. Trial/Trial software allows the user to evaluate the software for a limited time. After this trial period (usually from 15 to 90 days) the user can decide whether to buy the software or not. While, most trial software products are only time-limited some also have feature limitations. Paid/Usually commercial software or games are produced for sale or to serve a commercial purpose.
